Brazil's pesticide risk and CLIMATE CHANGE. DECENT WORK AND AGROCHEMICALS degrading working conditions WORKERS HEALTH

Non-cumulative predicted environmental concentration (PEC) of the most used

Active Ingridients m

How much of a specific chemical (an active ingredient in pesticides or other products) is expected to be found in the environment, based on its individual use.

Since 2003, over 60,000 people have been in slavery-like conditions, with 80% in sectors related to agriculture.
